

TechCheck is a short weekly tech-news show made for kids your age. Ada and Pixel share real stories about games, apps, coding, AI and staying safe online — and ask YOU what you think.

Easiest, safest way to watch:

techcheck.fm/grade/3-5

Free, no sign-in, no ads, no comments. Use the “Listen” tab if video is blocked.

Scan to open

Ways to watch or listen

- **techcheck.fm/grade/3-5** — the TechCheck page. Bookmark it! Nothing autoplays and there are no comments.
- **YouTube** — ask a grown-up to open our playlist on a family or supervised account. Turn Autoplay OFF so the next video is not a random one.
- **Podcast** — a grown-up can find “TFE Tech Check” in Spotify or Apple Podcasts to listen in the car.

Smart-and-safe rules

- **Start from the TechCheck page, not a search box.** Searching “tech news” finds lots of videos that are not for kids.
- **Stay in the show.** Don’t click ads, pop-ups or “up next” videos. When the episode ends, you’re done!
- **Keep your info private.** TechCheck never asks for your name, school, address or an account. If a page does, close it and tell an adult.
- **Check before you believe.** Ask an adult, look for a second source, and check the date.
- **If something feels wrong, stop and tell a grown-up.** You will never be in trouble for telling.

About Pixel (the AI co-host)

Pixel is an AI — a computer program that talks like a person. AI is great at explaining things and terrible at knowing when it is wrong. That’s why Ada and Pixel always check. You should too!

Try this at home

- Tell someone in your family the best story from this week’s episode.
- Pick one fact and fact-check it together.

My TechCheck pledge

- ☐ I go to TechCheck from the TechCheck page or my grown-up’s playlist.
- ☐ I keep Autoplay off and stay in the show.
- ☐ I never type my personal information.
- ☐ I check before I believe — and before I share.
- ☐ I tell a grown-up if something feels wrong.
